International Partnership for Nuclear Disarmament Verification

IPNDV UAE Plenary
November 1, 2016
• **Key Point:**
  – The Partnership is *initially* addressing the most important, most complex, and most challenging topic related to future arms control reductions – determining options for how to monitor the dismantlement of a nuclear warhead.

• **Goals:**
  – Advance efforts on completing the deliverables for each of the three IPNDV Working Groups by the end of 2017.
  – Consider areas for subsequent phases of the Partnership's work.
U.S.-Russia Monitoring and Verification Experience

U.S.-U.K. Program on Nonproliferation and Arms Control Technology

U.K.-Norway Initiative on Nuclear Warhead Dismantlement Verification

Plenary Meeting: November 1-3 in UAE

Joint Working Group Meeting: March 2017
Geneva or Vienna

Joint Working Group Meeting: June 2017
Geneva or Vienna

IPNDV Working Groups

Monitoring and Verification Objectives
On Site Inspections
Technical Challenges and Solutions

Roadmap
Roadmap - 2017

• Spring Joint Working Group Meeting
  – March 2017
  – Geneva or Vienna

• Summer Joint Working Group Meeting
  – June 2017
  – Geneva or Vienna

• Plenary
  – November/December 2017
Monitoring the Nuclear Weapons Lifecycle
Beyond Phase I

• As we approach the end of Phase I, we should keep in mind some key questions:
  – What elements of dismantlement require further consideration?
  – What elements of dismantlement did we not address/identify?
  – What phases of the lifecycle are the logical next step for our work?
